

Chirag Dixit

Software Engineer/AIML Engineer

+91-9906379547 | chiragdixit320@gmail.com | Jammu | linkedin.com/in/chiragdixit13 | github.com/chiragdixit13

SUMMARY

Computer Science Engineering graduate with expertise in Python, Java, Machine Learning, and Full-Stack Web Development. Skilled in developing AI/ML models using Scikit-learn and building responsive web applications with React.js and Firebase. Passionate about solving real-world problems through scalable software and data-driven solutions.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) 11/2022 – 07/2026 | Rohtak, Haryana
Maharshi Dayanand University-CGPA: 8.0

XII-Percentage: 96.4%, Oriental Academy Sr. Secondary School, Jammu 04/2021 – 06/2022 | Jammu

SKILLS

Programming: Python, Java, JavaScript	AI/ML: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn	Web: HTML, CSS, Firebase	Database: MySQL
Tools: Git, GitHub, VS Code	Core: Data Structures & Algorithms, OOP, Machine Learning		

PROFESSIONAL EXPERIENCE

MERN Stack Developer Intern, Techkriti IIT Kanpur 07/2025 – 08/2025 | Remote

- Built responsive web applications using React.js.
- Built reusable UI components and integrated REST APIs.
- Used Git and GitHub for version control and collaboration.

Java Programmer Intern, Techkriti IIT Kanpur 07/2025 – 08/2025 | Remote

- Designed Java applications using OOP principles.
- Implemented data structures and optimized program logic.
- Practiced debugging and software development best practices.

PROJECTS

SOS Emergency Web Application 

- Developed a Progressive Web Application (PWA) for emergency assistance with real-time location tracking.
- Integrated Firebase Firestore for live GPS updates and session management.
- Implemented SOS alerts with WhatsApp integration and emergency camera capture.
- Designed a responsive interface optimized for desktop and mobile devices.
- Skills:** Firebase, JavaScript, HTML, CSS

Customer Churn Prediction 

- Built a machine learning classification model to predict customer churn.
- Performed data preprocessing, feature engineering, and model evaluation.
- Compared multiple ML algorithms using accuracy and performance metrics.
- Generated actionable insights to support customer retention strategies.
- Skills:** Python, Scikit-learn, Pandas, NumPy, Matplotlib

Student Performance Analysis System 

- Developed a data analysis and prediction system for student performance.
- Cleaned and transformed academic datasets using Pandas.
- Built visual dashboards to identify performance trends.
- Applied machine learning models for performance prediction.
- Skills:** Python, Pandas, Matplotlib, Scikit-learn

CERTIFICATES

• Forage GenAI Powered Data Analytics Job Simulation	• Java Developer Certification	• MERN Stack Developer Certification
